SHAHID RASHEED

Karachi Pakistan | (+92) 345 2764252 | shahid.rasheed252@gmail.com | https://www.linkedin.com/in/shahidrasheed252

Personal Summary

SQA Automation Engineer with 4+ years of experience in manual and automation testing across FinTech, e-commerce, ride-hailing, and recruitment platforms. Skilled in designing automation frameworks and executing comprehensive testing for web applications, mobile apps, and APIs. Proficient in AI assisted test automation using Cursor and Claude, integrating automated test suites into CI/CD pipelines with Jenkins and GitHub Actions, and implementing testing strategies to improve software quality, reduce risks, and accelerate release cycles.

Skills

Cursor, Claude, Playwright, Selenium, Appium, Appium Inspector, Cucumber, SpecFlow, Gherkin, JavaScript, Java, C#, REST Assured, RestSharp, Postman, SoapUI, SQL, Apache JMeter, Jenkins, GitHub, GitHub Actions, Bitbucket Pipelines, Azure DevOps, ClickUp, Jira, Xray, TestNG, NUnit, Manual Testing, Functional Testing, API Testing, Mocha, Performance Testing, Automation Testing.

Work Experience

SQA Automation Engineer **09/2025 - 09/2026**
Venture Dive **Remote, Pakistan**

- Performed functional, regression, smoke, and exploratory testing across web, mobile, API, and Flutter applications while collaborating with cross-functional teams.
- Performed Stripe payment gateway testing, validating payment processing workflows, successful and failed transactions, payment status updates, and error handling.
- Built and maintained scalable automation frameworks using Playwright (JavaScript) with the Page Object Model (POM).
- Leveraged Cursor and Claude to accelerate test automation development by creating custom Cursor Rules, reusable Skills, and standardized automation templates, improving test generation speed, debugging, and code consistency.
- Automated Android and iOS mobile applications using Appium (Python) with XCUITest support for iOS.
- Developed and maintained Flutter integration tests for end-to-end cross-platform application validation.
- Integrated automated testing into Jenkins, GitHub Actions, and Bitbucket Pipelines to enable continuous testing.
- Configured scheduled regression suites to detect issues early and improve release quality.
- Integrated TestRail with automation frameworks for automated test execution, reporting, and traceability.
- Implemented automated notifications through Slack, Google Chat, and email for test execution and pipeline updates.

SQA Automation Engineer **08/2024 - 09/2025**
TPS Worldwide **Karachi, Pakistan**

- Performed System Integration Testing (SIT) for digital banking applications, validating end-to-end transaction flows and data exchange between integrated systems and APIs.
- Executed SIT scenarios for banking transactions, including fund transfers, transaction status updates, response validation, and transaction record verification across integrated services.
- Validated API integrations using RestSharp, verifying request and response payloads, status codes, business rules, and error handling between interconnected banking systems.
- Collaborated with development, product, and QA teams to investigate integration defects, analyze transaction failures, verify fixes, and ensure seamless communication between banking services..
- Maintained and enhanced the test automation frameworks by adding new scenarios to feature files and creating step definitions for new features.
- Utilized Selenium with C# for web UI automation, Appium for mobile automation, and RestSharp for API validation across digital banking
- Developed new functions and modified existing ones to support newly implemented features, utilizing SpecFlow to adopt a Behavior Driven Development (BDD) approach.
- Enhanced the mobile automation framework for a digital wallet app using Appium.
- Developed reusable helper functions and integrated Appium Inspector to streamline element identification and accelerate test development.

QA Automation Engineer **08/2023 to 08/2024**
Small World Financial Services **Karachi, Pakistan**

- Worked within an agile framework, participating in sprint planning, daily standups, and retrospectives to deliver features incrementally, adapt to changes, and continuously improve processes and collaboration.
- Executed positive, negative, and boundary test scenarios in the Omnex product to verify fund transfer, transaction calculations, identify discrepancies in fee and tax amounts, and ensure accurate financial processing.
- Developed and maintained automated test scripts using Selenium WebDriver to ensure the reliability and functionality of web applications
- Utilized Cucumber for Behavior-Driven Development (BDD) to clear communication among team members, creating readable test cases with Gherkin syntax, and automating their execution by integrating with Selenium WebDriver
- Utilized Jira for tracking and managing issues and X-ray for creating test plans within Jira, linking test cases to requirements and defects for traceability
- Performed smoke and regression testing after new releases to ensure critical functionalities are intact and to identify any new defects, maintaining the overall stability and quality of the application also maintained regression suite cases
- Utilized Git for version control, raising pull requests (PRs) for code reviews, and leveraging GitHub Actions to automate the execution of test cases, ensuring continuous integration and improving the development workflow

Associate SQA Engineer **01/2023 to 08/2023**
HashPotato **Karachi, Pakistan**

- Performed Smoke, Regression, Functional and Non Functional testing on both web and mobile applications in different environments
- Created bug reporting documents for Web and Mobile applications
- Managed Clickup for Bug reporting, aligning tasks to the developers
- Did performance testing on JMeter and Blaze meter
- Performed testing on localhost and live projects, using GitHub.

SQA Intern **10/2022 to 12/2022**
Qisstpay **Remote, Pakistan**

- Created test cases and performed testing on multiple devices, platforms, and browsers
- Executed test cases in different phases of testing: UI testing, functional, regression, integration, sanity and others
- Documented results of tests and created bug reports
- Took ownership for Identifying and analyzing questionable behaviors, errors, and inconsistencies in our web and mobile applications

Boot Camp (2 Months) **08/2022 to 10/2022**
Contour **Karachi, Pakistan**

- Learned Software Quality Assurance (SQA) fundamentals and software testing principles.
- Gained hands-on experience in manual testing, test case design, and defect reporting.
- Learned test automation fundamentals and automation best practices.
- Strengthened analytical thinking, debugging, and problem-solving skills.
- Developed a solid understanding of software quality assurance processes and industry best practices.

Certifications

- Introduction to JavaScript, 2024, TestAutomationU
- Automation with Selenium Web Driver and TestNg, 03/2023, 10PearlsUniversity
- SQL (Basic) Certificate, 01/2023, Hackerrank
- Cucumber with Java, 2022, TestAutomationU
- Automating your API tests with Rest Assured, 2022, TestAutomationU
- Selenium 4 in Java, 2022, TestAutomationU
- Introduction to TestNG, 2022, TestAutomationU
- QA Fundamentals, 09/2022, 10PearlsUniversity
- Software Testing, 06/2022, mygreatlearning.com
- API Testing Using Postman, 06/2022, mindluster.com

Education

Bachelor of Education (Basics of IT, General Mathematics) **01/2022**
Allama Iqbal Open University

Intermediate (Pre Engineering) **01/2014**
Hamdard College of Science Karachi

Projects

- API Testing Framework Using RestAssured with Cucumber for BDD Approach:
  https://github.com/shahid252/API_Automation_task

- UI Automation Project For a Client using Selenium with TestNG and Cucumber for BDD Approach:
  https://github.com/shahid252/UI-Automation-Selenium-Cucumber

- Selenium with TestNG Project:
  https://github.com/shahid252/Selenium-Framework

- Vinted Product Scraper (Automation Desktop Tool) Built a Python + Playwright-based automation tool to scrape Vinted listings and export structured data into Excel format.
  https://github.com/shahid252/vinted-automation.git

- AWS Infrastructure Automation using CloudFormation. Developed Infrastructure-as-Code (IaC) templates using AWS CloudFormation to provision EC2, RDS (MySQL) and S3.
